

Name: \_\_\_\_\_

Open your browser and go to [www.kiddle.co](http://www.kiddle.co).

Do a search for your school by typing the full name of your school into the search window [e.g. St Mary's National School].

How many pages did you find?

\_\_\_\_\_

Now go back to [www.google.com](http://www.google.com).

Type the full name of your school into the search window again, but this time put quotes " " around what you type in.

How many pages did you find this time?

\_\_\_\_\_

Did you get a different number than before?

\_\_\_\_\_

Now go back to [www.google.com](http://www.google.com) again.

This time search for a famous sports team, but don't use quotes.

How many pages did you find?

\_\_\_\_\_

Next go back to [www.google.com](http://www.google.com) one last time.

Search for the same sports team again, but this time use quotes around what you type in.

How many pages did you find now?

\_\_\_\_\_

What do you think is the difference between doing a search with quotes and without quotes?

\_\_\_\_\_

\_\_\_\_\_

Which do you think is better? Why?

\_\_\_\_\_
